Dear Mr. Ferguson:

Re: Approval of Plans and Specifications
for Water Main Extension and Sanitary
Sewers, Knightridge Manor Apartments,
Bloomington, Monroe County

You are hereby notified that the State Health Commissioner of the State of Indiana has this 16th day of June, 1965, approved the plans and specifications for the construction of water main extensions and sanitary sewers to serve approximately 300 apartment units of the Knightridge Manor Apartments.

This project will include the construction of approximately 2,221 feet of 12-inch and 6-inch water mains and all valves, fittings and other appurtenances to make a complete installation. These mains will connect to an existing 12-inch City of Bloomington water main along the north side of State Road 46 approximately 1,000 feet west of State Road 446. Also included in this project is the construction of a 200 gpm lift station and approximately 1,692 feet of 6-inch cast iron force main connecting to an existing 10-inch City of Bloomington sanitary sewer at a point on the north side of State Road 46 approximately 1,275 feet west of State Road 446.

It is understood that the standard sewer and water main construction specifications of the City of Bloomington will apply to this project.

This approval is given with the following conditions:

1. It is understood that the City of Bloomington will inspect the construction and accept the water distribution mains for maintenance upon completion as part of the City of Bloomington public water system.

Mr. James H. Ferguson

June 16, 1965

2. That the City of Bloomington agrees to the proposed sanitary sewer connection, and will provide inspection of the sewer construction and maintenance for the sewer system.

These plans and specifications were prepared and certified by John T. Stapleton, P.E., Bloomington, and submitted on May 13, 1965.

This approval shall be void if construction is not begun before July 1, 1966.

Sincerely,

A. C. OFFUTT, M. D.
